

Introducing Richard Smith Primary Computing

Richard runs a range of courses in the areas of Computing and Internet safety. These include subject leader courses and practical training that help staff to develop confidence.

Richard is the named person who Shropshire safeguarding officers refer schools to for internet safety advice and CPD (Continuous Professional Training).

Courses have included coding, robotics, greenscreen and computer aided design.

Richard Smith set up his own company, AmazingICT, thirteen years ago to inspire teachers to make better use of technology. He works in three different schools every week to support their development and runs a range of courses both locally and nationally.

Richard helps to run a Computing at School community that offers free advice and tips to teachers of Computing.

Enquiries about the latest courses and internet safety resources can be sent to cpd@chester.ac.uk

Richard actively shares ideas via Twitter <https://twitter.com/amazingict> to help staff.
