Information for Students

Who is the EP?

In school/college, you work with lots of adults who help you with your work and how you feel.

One adult who visits your school/college is the Educational Psychologist. You can use EP for short.

The EP is interested in:

How students learn and how they feel

What students like to do and what they think they're good at

What makes a school/college a good place to be

What students think about school/college

Your views on how school/college could be even better

Sometimes, the EP works with your teacher to help you in school/college

Sometimes, the EP works with groups of students

The EP might meet with you to talk about school/college. You can tell him or her how you think and feel. You might do some reading, number work, or other task.

The EP might talk with you once or more than once. He or she will work with you, your parents or carers and your teachers to try and make things better for you at school/college.

If you are worried about meeting the EP, you can talk to your teachers or your parents or carers.
